SYNOPSIS

- **SYNOPSIS TITLE-**

CORPORATE OFFICE (INFORMATION TECHNOLOGY)

- **INTRODUCTION**

What makes the time that we are living through today unique, is the rapid pace of change. Like many other sectors software company has undergone tremendous changes. Intense competition, open architecture, readily available capital is introducing to AI generation to continue to adapt and innovate. Yet many of their workspaces is designed for a completely different era of work.

- **NEED OF THE TOPIC**

- Now a days offices need good interior and soothing ambience
- I choose this project because **improves morale, increases productivity, enhances name brand, and builds customer and client confidence.**

- **OBJECTIVE**

- Sense of place, community and ownership
- Reflect **INFORMATION TECHNOLOGY** work culture
- Stimulate creativity- fostering innovation
- Inspiring place to work, think and create- energetic
- Futuristic, sustainable- flexible and scalable workplace
- Variety of work settings providing choices to employees
- Efficient and productive workplace

LOCATION OF THE SITE :

• METHODOLOGY

1. Preliminary stage:

- **Collection of data and information relevant to the project.**
 - References from library and Internet.
- **Visit proposed site Assited analysis**
 - Site parameters/ field visits and study
 - Assessment of locally available construction materials.
 - Climatic analysis
 - Traffic flow analysis

2. Secondary stage:

(a)Planning

- Development of master planning
- Conceptual planning of site.
- Traffic management and parking

- Conceptual design of building
- General layout of building as per requirements

(b)Building

- General layout/arrangement
- Interior plans/elevations/sections
- 3d views/model.

- **CONCLUSION**

- Future Scope
- Office layout **refers to the scientific and systematic arrangement facilities inside an office.**
- It places different resource such as furniture, machine, and equipment at an appropriate location. .
- It allows free flow of work and free movement of an employee at work.

- **CASE STUDY**

SITE ANALYSIS

INTRODUCTION

A corporate office is the main office, also called the headquarters, of a corporation. This office is usually the hub of the company and often serves as the central location where top decisions are made. The corporate office is generally where the executives of the company, including the CEO, maintain their offices.

A software company is an organisation — owned either by the state or private — established for profit whose primary products are various forms of software, software technology, distribution, and software product development. They make up the software industry.

LOCATION

Lucknow District covers an area of 2,528 Square Kilometers (976 Sq mi). Bounded on the east by Barabanki, on the west by the Unao, on the south by the Raebarali and the north by the Sitapur and Hardoi, Lucknow sits on the north western shore of the Gomti River.

The city stands at an elevation of approximately 123 meters (404) Ft above sea level.

INTRODUCTION

In corporate interior, you have to take into account the work processes and clients' activities. Employees need to feel free and their communication need to be smooth sailing. You have to consider the meeting place, clients' waiting space, files and stationery storage space, canteen, washroom, and many other aspect

CONCEPT

INDUSTRIAL EDGE DESIGN

INTRODUCTION

The 'edge' in industrial edge is also open to interpretation, meaning you can incorporate any other interior style into your industrial design. Popular combinations include industrial + mid-century, industrial + Scandinavian, and industrial + cottage chic.

The industrial style is a versatile and neutral style that stands out for the combination of different materials such as wood, metal, concrete and iron, but also for the brick walls, the stripped floors, the visible beams and the concrete floors

Industrial edge computing is a distributed computing framework where the data generated by network-connected devices in these industrial edge facilities is processed locally instead of sent off to a centralized data center. This reduces latency, unlocks real-time data analysis, reduces bandwidth utilization, and more

INDUSTRIAL EDGE DESIGN

PLAN

INDUSTRIAL EDGE DESIGN

REFERENCE IMAGES

For this style, different tones of yellow, white, dark gray, brown and black are favored. You can use these colors on your wall and floor coverings or highlight them using different furniture textiles and accessories

INDUSTRIAL EDGE DESIGN

Neutral Colour Palettes

Grey, black, and white. Layer these shades with [darker tones for a moodier look](#). But don't think you're limited to neutral colours: unexpected pops of colour in vibrant art pieces also provides a gorgeous contrast that ties the entire space together

industrial design, you'll almost always think of exposed pipes and ducts. While typically these are things that builders and interior designers try to conceal, with modern industrial interior design, these raw elements left exposed not only creates a unique appeal, it also eliminates the need for further construction if not absolutely

INDUSTRIAL EDGE DESIGN

Toughened glass is the most common type of glass used in partitioning. This glass is taken through a heating process to toughen it, making it four to five times stronger and more durable than annealed glass

LIGHTING

In general, warm yellow or warm orange lights are better for relaxing and unwinding, while cool blue or cool white lights are better for waking up, working, and concentrating.
