ACKNOWLEDGEMENT

First and foremost gratitude towards the almighty "**GOD**" for his blessings.

I am thankful to **Ar. ARVIND KUMAR SINGH, Prof. Keshav Kumar, Ar SANGEETA SHARMA** and all my faculty members who have been extremely co-operative since the very beginning and who helped me to utilize my skills and creativity to the utmost.

Sincere thanks to **Ar. URVASHI TEWARI and Ar. SHAILESH KR. YADAV** (Thesis Co-ordinator), who left no stone unturned to shape our thesis in the best possible way and also for his untimely help whenever required.

I express my deepest gratitude to my thesis guide **Ar. VARSHA VERMA**, for his valuable dispassionate guidance, critical discussions, suggestions and continuous support all through my B.Arch thesis.

Special thanks to my seniors **AR. SHUBHA SHUKLA, AR. SHAKCHI SINGH, AR. TABISH KHAN** for their guidance and support regarding the studies for this project as well as the whole 5 years of study.

I would like to thank all my friends specially **VIKAS, ANSHUMAN, SARTHAK, REHAN, AKASH, VINEET, SANDEEP, DIVYANSHI, DIKSHA, VINEET GAUR** for their support during my thesis as well as the whole 5 year of study. Each one of them has contributed towards making me a better person and the time I spent with all of them will always be cherished.

Thanks to all my juniors specially **ANUSHKA, ANSHIKA, SHIVANI, VANSHITA, ADITYA ,SOMYA SINGH and DIVYA** for their help in the thesis.

At last but not the least, I have no words to express my gratitude for the love and affection of my parents who gave me support at every step of my life. So, this thesis is dedicated to them.

URBAN OASIS
(HOUSING)

“
AN EFFORT TOWARDS CREATION
IN HARMONY WITH NATURE
”

INTRODUCTION

The sustainability can be defined as MEETING THE NEEDS OF TODAY WITHOUT COMPROMISING THE NEEDS OF FUTURE GENERATIONS. Sustainable housing has the potential to produce good quality housing at a price that is affordable both in the short and long term. Thus, sustainable housing must aim at ECONOMIC, SOCIAL AND ENVIRONMENTAL SUSTAINABILITY FROM PLANNING TO IMPLEMENTATION PHASE and at the same time result in housing that is AFFORDABLE, ACCESSIBLE AND ENVIRONMENTALLY LESS DAMAGING

The National Urban Housing and Habitat Policy-2007 intends to promote sustainable development of habitat in India with a view to ensuring equitable supply of land, shelter and services at affordable prices to all sections of society

Not withstanding numerous attempts,sustainable housing has remained difficult to define, yet it should be coherent to certain

CHARACTERISTICS OF SUSTAINABLE DEVELOPMENT

(1) help for the very poor because they are left with no option other than to destroy their environment,
(2) the idea of self-reliant development, within natural resource constraints,
(3) the idea of cost-effective development, meaning thereby that development should not degrade environmental quality, nor should it reduce productivity in the long run,
(4) the issues of disease control, appropriate technologies, food security, clean water and shelter for all,
(5) the notion that people-centred participatory initiatives are needed; human beings in other words, are the resources in the concept.

FROM THIS PERSPECTIVE THE SUSTAINABLE HOUSING POLICY SHOULD INCORPORATE THREE OBJECTIVES :

- that future policies must provide the basis for household improvement.
- policies which could result in sustainable housing improvement is concerned with the empowerment of poor people.
- The third objective of such policies must be to psychologically give the lower segment of the urban society a feeling of self-worth.

Thus, in order to be sustainable, housing initiatives must be economically viable, socially acceptable and affordable, technically feasible and environmentally-friendly.

HISTORY AND BACKGROUND

Although many consider it a contemporary movement, fueled by the concerns of climate change, sustainability has been a component of architectural design throughout history.

Today's green designers are not the first to consider the importance of utilizing renewable or organic resources; architects have been building with the environment in mind for centuries.Simple and smart sustainable design methods, such as building with local materials or harnessing natural energy, were employed before technological advancements in construction. Built in the 12th Century, the Cambodian temple complex Angkor Wat, featured a rainwater irrigation system that collected water during monsoon season, which allowed for rice farming during the drier months.

Today's environmental and economic challenges have once again brought sustainability to the forefront of design and production methods. Many architectural firms and building contractors are now very concerned with creating eco-friendly structures

NEED OF TOPIC .....?

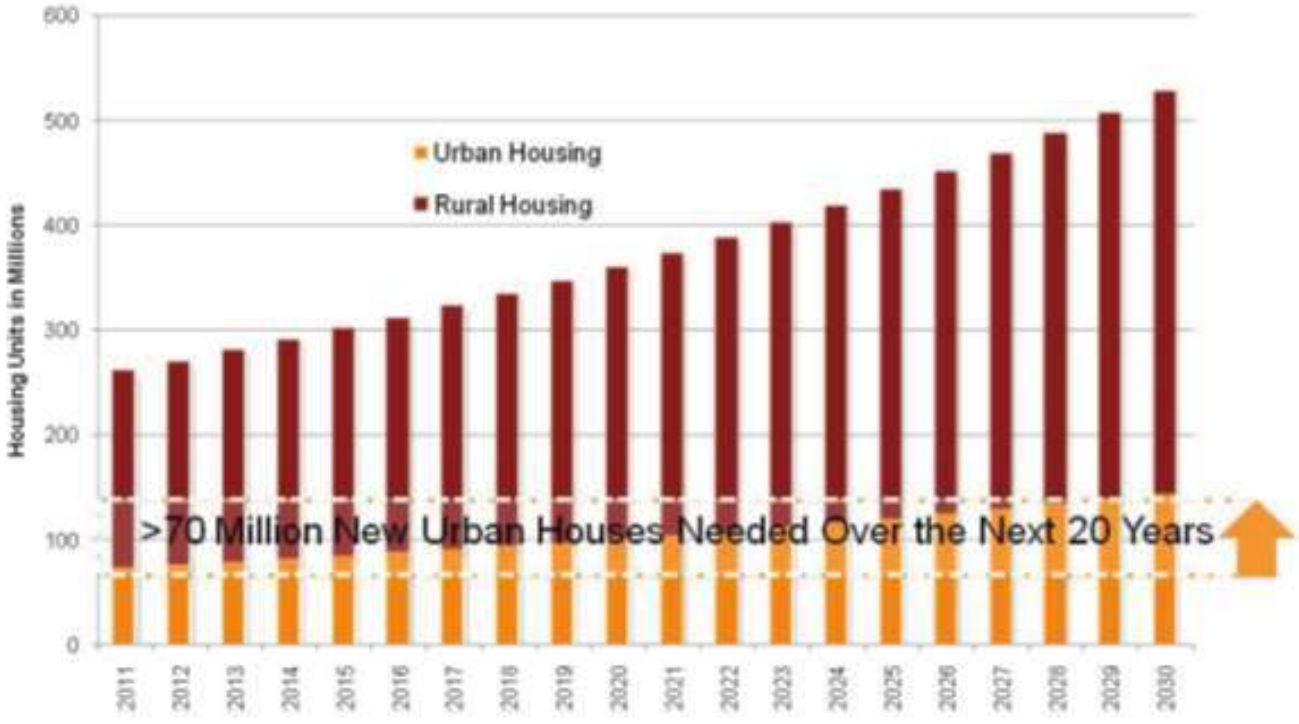
Potential contribution of housing to sustainability

It is pertinent to note that housing sector can significantly contribute to sustainability because of its close association with environmental aspects:

1. Buildings consume large amounts of natural and man-made resource in construction, maintenance and continued use by society.
2. Buildings are a fixed asset with a long operational lifespan.
3. Buildings are among the fundamental necessity for a good quality of life, and thus have implications beyond housing affecting transport, health, employment and community.
4. Buildings are amenable to numerous ways in which recycled materials can be reused for construction.
5. Large number of innovations are available for efficiently operating the buildings including use of recycled material for construction, wastewater treatment and use,energy efficiency, solar heating, passive solar heating, creating urban green spaces in proximity to compact housing.

URBANIZATION SCENARIOS

In 1950, developing nations accounted for less than 40% of the world's urban population. By 2005 that figure reached 70%. It is projected that urban population in developing nations will continue to grow reaching 80% by 2030. By 2050, 93% of the urban population growth will occur in developing countries [23]. One of the major challenges faced by cities today is the growing number of urban dwellers living in slum conditions. About one third of the world urban population live in these conditions and if populations continue to grow it is estimated that 889 million people will live in slums by 2020.The slum population faces challenges ranging from insecure tenure and poor shelter conditions to the lack of access to basic infrastructure facilities like water supply, sanitation and solid waste disposal.This is likely to intensify as over 70 million new
urban housing units will be needed over the next 20 years in India



Source: Planning Commission 11th Plan Report & EDS Analysis

BALANCING ENVIRONMENT WITH URBAN GROWTH

TO BALANCE ENVIRONMENT WITH URBAN GROWTH SEVERAL CONCEPTS NEED TO BE DERIVED THESE CONCEPTS PROVIDE US NETWORKED AND INTRICATELY LINKED ACTION POINTS THAT WOULD NEED TO BE INTEGRATED TO ACHIEVE A BALANCE BETWEEN URBANIZATION AND ENVIRONMENT. THESE INCLUDE:

1. **SUSTAINABLE COMMUNITIES**
2. SUSTAINABLE CITIES
3. LIVEABLE CITIES
4. GREEN CITIES
5. PROSPEROUS CITIES
6. ECO-CITIES
7. HEALTHY CITIES
8. RESILIENT CITIES

AIMS AND OBJECTIVES

AIM

TO CREATE A DEVELOPMENT THAT SEPARATES FROM CURRENT CONCRETE JUNGLE CONCEPT OF HOUSING

OBJECTIVES

- CREATE A DEVELOPMENT WHICH IS SUSTAINABLE, INNOVATIVE AND RESOURCE EFFICIENT THROUGH THE INCORPORATION OF A RANGE OF ENVIRONMENTAL FEATURES TO REDUCE THE DEVELOPMENT'S CARBON FOOTPRINT.
- PROMOTE TENANT/COMMUNITY INVOLVEMENT IN THE DESIGN AND DECISION MAKING PROCESS.
- OBSERVE THE SITE'S CONTEXT AND INTEGRATE ANY NEW DEVELOPMENT WITH THE SURROUNDING BUILT ENVIRONMENT AT BOTH A PHYSICAL AND COMMUNITY BASED LEVEL.
- PROVIDE A SAFE AND PLEASANT ENVIRONMENT PROVIDING SECURITY, AS WELL AS BEING MODERN AND ATTRACTIVE.
- RE-ESTABLISH CONNECTIVITY WITH THE EXISTING TOWN THROUGH ACCESSIBLE AND LEGIBLE PEDESTRIAN AND VEHICULAR ROUTES WITH APPROPRIATE SUPERVISION.
- PROVIDE A MIX OF HOUSE TYPES, WITH HOUSING DESIGNED ON A SCALE APPROPRIATE TO THE SURROUNDING ENVIRONS.

- MEET THE NEEDS OF THE COMMUNITY IN TERMS OF CHOICE OF HOUSING THROUGH MIXED TENURE AND AFFORDABILITY.
- PROVIDE HOUSING WHICH IS ACCESSIBLE AND ADAPTABLE BY OBSERVING BARRIER FREE AND HOUSING FOR VARYING NEEDS PRINCIPLES.
- CREATE A PLATFORM FOR THE ANALYSIS, INVESTIGATION OF NEED AND USE OF APPROPRIATE COMMUNITY FACILITIES, WITHIN THE WIDER KINCARDINE AREA.
- TO CREATE A "SENSE OF PLACE".

SCOPE

PROJECT WILL INCLUDE HABITAT FOR PEOPLE INSPIRED FROM URBAN SOCIOLOGIST RAY OLDENBURG PHILOSOPHY, ACCORDING TO HIM PEOPLE NEED THREE TYPES OF PLACES TO FEEL FULFILLED:

"HOME- PRIVATE RELIEF,
WORK - ECONOMIC ENGAGEMENT
LEISURE- SOCIAL INTEGRATION."

RISKS

PRODUCING ANOTHER VERTICAL CONCRETE TOWER THAT DOESNOT SUITS WITH CURRENT REQUIREMENT AND ALSO THREATEN THE FUTURE GENERATIONS NEEDS

S.W.O.T.
ANALYSIS

STRENGTH AND OPPORTUNITY

- HABITAT THAT INDULGE WITH NATURE
- PLANNING STRATEGIES TO USE AVAILABLE RESOURCES IN EFFICIENT MANNER
- SCOPE FOR INCORPORATING COMMUNITY SPACES THAT CAN BE ECONOMICALLY BENEFECIAL FOR HABITANTS
- CREATING SPACES THAT ARE MULTI-DISCIPLINARY

WEAKNESS AND THREATS

- IF DONE IN TYPICAL MANNER WITHOUT CONSIDERING FUTURE ASPECTS; MAY RESULT INCREAMENT OF - "CONCRETE JUNGLE"
- PROVISION OF COMMUNITY SPACES AT GROUND LEVEL DECREASES INTERACTION LEVEL BETWEEN UPPER FLOORS HABITANTS
- MOSTLY THE LAND LOOSES ITS INITIAL BIO-DIVERSITY AFFECTING ECOLOGICAL BALANCE

PROJECT REQUIREMENTS

- HOMES FOR HABITANTS
- GREEN SPACES AND RECREATIONAL SPACES AT GROUND LEVEL
- LIMITED COMMERCIAL SPACES FOR CONVENIANCE OF HABITANTS
- COMMUNITY GATHERING PLACES AT DIFFERENT LEVEL

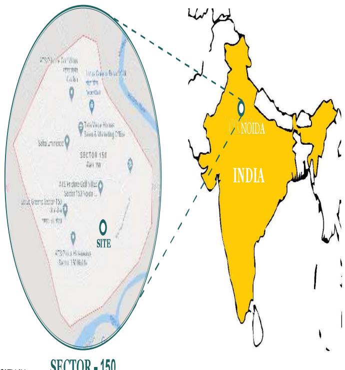
- SITE SUSTAINABILITY

NOIDA CONSTITUTED UNDER THE **U.P. INDUSTRIAL AREA DEVELOPMENT ACT, 1976** NOIDA, SHORT FOR THE **NEW OKHLA INDUSTRIAL DEVELOPMENT AUTHORITY**, IS A PLANNED CITY UNDER THE MANAGEMENT OF THE NEW OKHLA INDUSTRIAL DEVELOPMENT AUTHORITY (ALSO CALLED NOIDA). IT IS A SATELLITE CITY OF DELHI AND IS PART OF THE NATIONAL CAPITAL REGION OF INDIA. AS PER PROVISIONAL REPORTS OF CENSUS OF INDIA, **THE POPULATION OF NOIDA IN 2011 WAS 642,381.** NOIDA IS LOCATED IN GAUTAM BUDDH NAGAR DISTRICT OF UTTAR PRADESH STATE IN CLOSE PROXIMITY TO NCT OF DELHI. THE DISTRICT'S ADMINISTRATIVE HEADQUARTERS ARE IN THE NEARBY TOWN OF GREATER NOIDA.

NOIDA WAS RANKED AS THE BEST CITY IN UTTAR PRADESH AND THE BEST CITY IN HOUSING IN ALL OF INDIA IN "BEST CITY AWARDS" CONDUCTED BY ABP NEWS IN 2015. NOIDA REPLACED MUMBAI AS THE SECOND-BEST REALTY DESTINATION, ACCORDING TO AN ANALYST REPORT. ROADS IN NOIDA ARE LINED BY TREES AND **IT IS CONSIDERED TO BE INDIA'S GREENEST CITY WITH NEARLY 50% GREEN COVER, THE HIGHEST OF ANY CITY IN INDIA.**



SECTOR - 150

WHY...? NOIDA

SINCE IT IS THE BEST CITY IN HOUSING AWARDED BY ABP NEWS WITH MORE AND MORE OF CONCRETE JUNGLES SUPPORTED BY MAX TO MAX 80% OPEN SITE SPACE, SO IT IS FAVOURABLE TO PROPOSE AN URBAN HOSUING PROJECT ACTING AS OASIS IN THAT AREA

HISTORY AND BACKGROUND

ALTHOUGH MANY CONSIDER IT A CONTEMPORARY MOVEMENT, FUELED BY THE CONCERNS OF CLIMATE CHANGE, SUSTAINABILITY HAS BEEN A COMPONENT OF ARCHITECTURAL DESIGN THROUGHOUT HISTORY.

TODAY'S GREEN DESIGNERS ARE NOT THE FIRST TO CONSIDER THE IMPORTANCE OF UTILIZING RENEWABLE OR ORGANIC RESOURCES; ARCHITECTS HAVE BEEN BUILDING WITH THE ENVIRONMENT IN MIND FOR CENTURIES. SIMPLE AND SMART SUSTAINABLE DESIGN METHODS, SUCH AS BUILDING WITH LOCAL MATERIALS OR HARNESSING NATURAL ENERGY, WERE EMPLOYED BEFORE TECHNOLOGICAL ADVANCEMENTS IN CONSTRUCTION. BUILT IN THE 12TH CENTURY, THE CAMBODIAN TEMPLE COMPLEX ANGKOR WAT, FEATURED A RAINWATER IRRIGATION SYSTEM THAT COLLECTED WATER DURING MONSOON SEASON, WHICH ALLOWED FOR RICE FARMING DURING THE DRIER MONTHS.

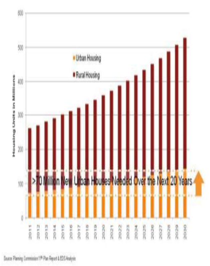
TODAY'S ENVIRONMENTAL AND ECONOMIC CHALLENGES HAVE ONCE AGAIN BROUGHT SUSTAINABILITY TO THE FOREFRONT OF DESIGN AND PRODUCTION METHODS. MANY ARCHITECTURAL FIRMS AND BUILDING CONTRACTORS ARE NOW VERY CONCERNED WITH CREATING ECO-FRIENDLY STRUCTURES

NEED OF TOPIC ....?

POTENTIAL CONTRIBUTION OF HOUSING TO SUSTAINABILITY
IT IS PERTINENT TO NOTE THAT HOUSING SECTOR CAN SIGNIFICANTLY CONTRIBUTE TO SUSTAINABILITY BECAUSE OF ITS CLOSE ASSOCIATION WITH ENVIRONMENTAL ASPECTS:
1. BUILDINGS CONSUME LARGE AMOUNTS OF NATURAL AND MAN-MADE RESOURCE IN CONSTRUCTION, MAINTENANCE AND CONTINUED USE BY SOCIETY.
2. BUILDINGS ARE A FIXED ASSET WITH A LONG OPERATIONAL LIFESPAN.
3. BUILDINGS ARE AMONG THE FUNDAMENTAL NECESSITY FOR A GOOD QUALITY OF LIFE, AND THUS HAVE IMPLICATIONS BEYOND HOUSING AFFECTING TRANSPORT, HEALTH, EMPLOYMENT AND COMMUNITY.
4. BUILDINGS ARE AMENABLE TO NUMEROUS WAYS IN WHICH RECYCLED MATERIALS CAN BE REUSED FOR CONSTRUCTION.
5. LARGE NUMBER OF INNOVATIONS ARE AVAILABLE FOR EFFICIENTLY OPERATING THE BUILDINGS INCLUDING USE OF RECYCLED MATERIAL FOR CONSTRUCTION, WASTEWATER TREATMENT AND USE ENERGY EFFICIENCY, SOLAR HEATING, PASSIVE SOLAR HEATING, CREATING URBAN GREEN SPACES IN PROXIMITY TO COMPACT HOUSING.

URBANIZATION SCENARIOS

IN 1950, DEVELOPING NATIONS ACCOUNTED FOR LESS THAN 40% OF THE WORLD'S URBAN POPULATION. BY 2005 THAT FIGURE REACHED 70%. IT IS PROJECTED THAT URBAN POPULATION IN DEVELOPING NATIONS WILL CONTINUE TO GROW REACHING 80% BY 2030. BY 2050, 93% OF THE URBAN POPULATION GROWTH WILL OCCUR IN DEVELOPING COUNTRIES [23]. ONE OF THE MAJOR CHALLENGES FACED BY CITIES TODAY IS THE GROWING NUMBER OF URBAN DWELLERS LIVING IN SLUM CONDITIONS. ABOUT ONE THIRD OF THE WORLD URBAN POPULATION LIVE IN THESE CONDITIONS AND IF POPULATIONS CONTINUE TO GROW IT IS ESTIMATED THAT 889 MILLION PEOPLE WILL LIVE IN SLUMS BY 2020. THE SLUM POPULATION FACES CHALLENGES RANGING FROM INSECURE TENURE AND POOR SHELTER CONDITIONS TO THE LACK OF ACCESS TO BASIC INFRASTRUCTURE FACILITIES LIKE WATER SUPPLY, SANITATION AND SOLID WASTE DISPOSAL. THIS IS LIKELY TO INTENSIFY AS OVER 70 MILLION NEW URBAN HOUSING UNITS WILL BE NEEDED OVER THE NEXT 20 YEARS IN INDIA



SCOPE

PROJECT WILL INCLUDE HABITAT FOR PEOPLE INSPIRED FROM URBAN SOCIOLOGIST RAY OLDENBURG PHILOSOPHY, ACCORDING TO HIM PEOPLE NEED THREE TYPES OF PLACES TO FEEL FULFILLED:

"HOME- PRIVATE RELIEF,
WORK- ECONOMIC ENGAGEMENT
LEISURE- SOCIAL INTEGRATION."

CASE STUDY -1

ASIAN GAMES VILLAGE
NEW DELHI

INTRODUCTION

The Asian Games Village is located in the Siri Fort area, near Hauz Khas in New Delhi, India.

The site was developed as the athlete's village for the **1982 Asian Games** held in New Delhi. **This site was designed by Raj Rewal.** The village is the first of its kind in the Games series. Built on the remains of the 15th Century Khalji Dynasty's Siri Fort over an area of 35 acres, this residential colony has 900 housing units comprising 300 individual town houses and 600 apartments in two Floors to four Floors with each unit type has variations according to areas. **The average size of flats is about 1200 sq.ft., some 900 sq.ft. and some 1800 sq.ft.**
Former President of India **APJ Abdul Kalam** was resident in the colony prior to his nomination to that position.

Asian Games Village is one of the most desirable area of New Delhi as it is surrounded by the lush green spaces of Siri Fort Ridge and located next to the Siri Fort sports complex which hosted the squash and badminton tournaments during the 2010 Commonwealth Games. Asiad Village is directly accessible from within to Sirifort Sports Complex with an exclusive entrance. Asian Games Village consists of various blocks and lanes named after eminent sportspersons from India.

VALIDITY AND OBJECTIVE OF CASE STUDY

SUSTAINABLE PRINCIPLES POINTS THAT ARE COVERED IN THIS CASE STUDY

- **WATER EFFICIENCY**
  INITIALLY RAIN WATER HARVESTING SYSTEM WAS NOT INVOLVED IN DESIGN SCHEME BUT IN 2019 IT HAS BEEN PROPOSED WHICH IS UNDER CONSTRUCTION NOW IS INCORPORATED BASICALLY FOR COLLECTING RUNOFF FROM SITE ROADS AND FROM ROOF TOPS OF HOUSING UNITS TO USE THE RESERVE WATER FOR IRRIGATION OF LANDSCAPING PARTS OF THE SITE.
- **SUPERIOR INDOOR ENVIRONMENT**
  A CLUSTER IN ASIAN GAMES VILLAGE THE BASIC UNIT OF FOUR APARTMENTS IS DESIGNED IN SUCH A WAY THAT IT CAN BE LINKED WITH A COURTYARD IN BETWEEN TO CREATE A VARIETY OF INTERLINKING SPACES.
- **EFFECTIVE WASTE MANAGEMENT**
  USE OF ORGANIC WASTE(GENERATED FROM SHEDDING OF LEAVES) AS MANURE FOR ON SITE LANDSCAPING
- **SITE SUSTAINABILITY**
  SUFFICIENT OPEN SPACES,SHADED ROADS BY LARGE TREES ALONG THE ROADS,PROVISION OF THE PARKING ALONG THE ROADSIDE AS WELL AS FOR HOUSING UNITS ALSO, PROVISION OF 16 MT WIDE ROADS AS SETBACK AND 9 MT WIDE ROADS AS INTERNAL ROADS,WASTE DUMPING AREAS AT THREE CORNERS OF THE SITE GIVE EASY ACCESS TO WASTE DISPOSAL,USE OF E-BIKES WITHIN SITE FOR TRAVELLING PURPOSE IS ALSO INCORPORATED REDUCING POLLUTION LEVEL AT MICRO LEVEL.

ARCHITECT'S OBJECTIVE AND CONCEPT OF DESIGN

THE CONCEPT IS BASED UPON A SEQUENCE OF OPEN SPACES LINKED BY NARROW, SHADED PEDESTRIAN STREETS AND CONTAINING BOTH RECREATIONAL AND COMMERCIAL ACTIVITIES.

IDEA BEHIND THE CONCEPT
AN OBVIOUS SOURCE OF INSPIRATION FOR SUCH NARROW STREETS LINKING THE HOUSING UNITS IS THE TRADITIONAL STREET SCALE AND PATTERN FOUND IN MANY INDIAN CITIES, WHERE NARROW PATHS BECOME SPACES FOR ENCOUNTERS BETWEEN PEOPLE, AND THE OPEN SQUARES OFFER A SENSE OF NEIGHBOURHOOD.

ACE PARKWAY,SECTOR-150 NOIDA

INTRODUCTION

ACE PRESENTS ITS NEWLY LAUNCHED REMARKABLE PROJECT ACE PARKWAY NESTED ON THE NOIDA EXPRESSWAY. WITH **970 FLATS**, ACE PARKWAY FOCUS IT'S CENTRED AT INTERNATIONAL BUYERS AND INVESTORS. PEOPLE AT PARKWAY CAN AVAIL ALL THE 51 SPORTS FACILITIES RANGING FROM CROQUET, SQUASH, TRAMPOLINE TO HANDBALL, TENNIS OTHER THAN BASKETBALL, BADMINTON AND CRICKET TO SPEND THEIR LEISURE TIME ENJOYING AND RELAXING. DESIGNED BY THE REPUTED AND **PADMA BHUSHAN AWARDEE INDIAN ARCHITECT HAFEEZ CONTRACTOR**, ITS ELEVATION IS IN PROPORTIONATE IN THE ART DECO ESSENCE OF DESIGN. THE LANDSCAPE IS OUTLINED AND DETAILED BY THE RENOWNED LANDSCAPE DESIGNER **MS. SANJU BOSE.**

CONSTRUCTION METHODOLOGY
R.C.C. USED AS MAJOR CONSTRUCTION MATERIAL

UPTO 2ND FLOOR BRICK WORK USED AS WALLS THAN R.C.C IS USED FOR INCREASING WEIGHT TO ATTAIN MORE SELF BALANCE

ALUMINIUM FOAM WORK AS SHUTTERING KNOWN AS **MIVAN SHUTTERING OF MIVAN BRAND**
WALLS AND SLABS ALL MADE OF R.C.C

PROS

- PLANNED AND AVAILABLE WITH MODERN FASCILITES
- PLANNED SURROUNDING GIVE SENSE OF DISCIPLINE IN DAILY LIFE
- RIGHT OF WAY INSIDE AND OUTSIDE ARE SUFFICIENT
- PROPER ELECTRICAL AND WATER SUPPLY BACK UP
- RICH NATURAL ENIRONMENT VIEW FROM UNITS

CONS

- MONOTONOUS NATURE OF DESIGN
- ISOLATED FROM VARIOUS DAILY ACTIVITIES ZONE
- LACK OF MEANS OF TRANSPORT FROM NEARY AREAS

OMAXE RESIDENCY-2
LUCKNOW

INTRODUCTION

HE OMAXE RESIDENCY 2 WILL HAVE A HUGE CLUBHOUSE WHICH WILL HAVE A SWIMMING POOL. THE SWIMMING POOL WILL ALSO HAVE A WET AREA DEDICATEDLY ALONG WITH AN AREA FOR THE SHOWER.IT WILL HAVE A RESTAURANT, BAR AND THERE WILL BE TENNIS TABLE AS WELL AS SNOOKER TABLE. ON THE TERRACE OF THE CLUBHOUSE IN OMAXE RESIDENCY 2 THERE IS A PARTY AREA DEDICATED EXCLUSIVELY FOR THE RESIDENTS AT OMAXE RESIDENCY 2. THE OMAXE RESIDENCY 2 WILL HAVE NEARBY AMENITIES LIKE SAHARA HOSPITAL, CITY MONTESSORI SCHOOL AND INTERNATIONAL STADIUM AS WELL. FOR SHOPPING THERE IS AN UPCOMING MALL IN OMAXE HAZRATGANJ ALSO THE SOCIETY WILL FULL OF SHOPS.

MIRADOR, by MvRdv & Blanca Lleo

SANCHINARRO, SPAIN

INTRODUCTION

-THE ARCHITECT: MVRDV AND BLANCA LLEO
-THE CLIENT: EMV DEL AYUNTAMIENTO DE MADRID
-TIME: MAY 2001- APRIL 2005

-PROJECT: MAYOR OF MADRID, ALBERTO RUIZ-GALLARDON, INITIALIZED A HOUSING PROGRAM TO ADD DENSITY AND HOUSING TO THE QUICKLY GROWING SPANISH CITY OF MADRID. MVRDV IS ONE OF TEN EUROPEAN FIRMS HIRED TO COMPLETE PROJECTS UNDER THIS NEW PROGRAM.

-23,000 SQUARE METERS, HOUSING 157 APARTMENTS AND A 12 FLOOR CENTRAL COURTYARD THAT IS 580 SQUARE METERS IN AREA AND 13 METERS TALL

1 www.todoarquitectura.com/ v2/noticias/one_news.asp?IDNews=935 - 36k
2 http://www.materiamagazine.com/materia/progettoScheda2?id=1654495124

CONCEPT

MVRDV TOOK THE COMMON 5 TO 8 FLOOR NEIGHBORHOOD BUILDING BLOCK WITH A CENTRAL COURTYARD AND PATIO AND LITERALLY FLIPPED IT ON ITS END CREATING A COURTYARD IN THE AIR TO BRING THE COMMUNITY TOGETHER.

ORIGINALLY THERE WAS GOING TO BE AN ESCALATOR RUNNING FROM THIS

"A SERIES OF NEW CITIES THAT ARE MAINLY CONSTRUCTED OF LOCKS THAT SURROUND A PRIVATE PATIO, WITH A MORE OR LESS INTROVERTED ARCHITECTURE WITH SMALL WINDOWS, SOMEHOW IS ALLOWED TO OPPOSE THE TRADITIONALLY EXTRAVERTED SPANISH CULTURE."

1 Quotation and drawing out of KM3 by MVRDV

BESIDES ITS INNOVATIVE FORMAL CONCEPT, THE PROJECT ALSO TURNS THE IDEA OF SOCIAL HOUSING ON ITS HEAD.

9 DIFFERENT BUILDING BLOCKS ARE GLUED AND STUCK TOGETHER TO FORM WHAT THE ARCHITECTS CALL A "SUPERBLOCK".

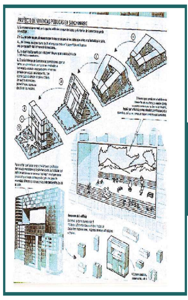
EACH OF THE DIFFERENT BUILDING BLOCK IS MADE UP OF FOUR TO EIGHT APARTMENTS AND EACH BLOCK IS A DIFFERENT TYPE OF APARTMENT.

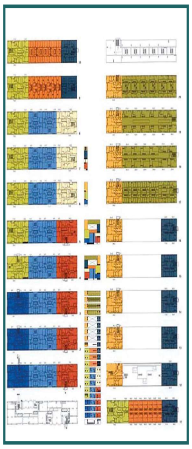
1 Plans found at http://www.people.cornell.edu/pages/gks26/works/mirador01.htm
2 Concept explained at MVRDV's website www.mvrdv.nl

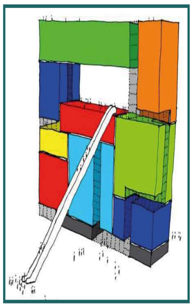
THE DIFFERENT FLOOR PLANS AND APARTMENT STYLES ARE REPRESENTED BY THE FAÇADE TREATMENT OF EACH OF THE BUILDING BLOCKS.

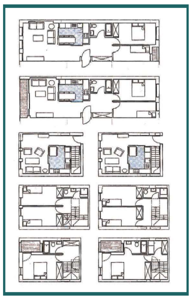
THE UNITS ON FLOOR NINE AND HIGHER ARE ALL DUPLEXES OR TRIPLEXES AND CAN ONLY BE ACCESSED BY END LIFT CORES ON ELEVENTH, EIGHTEENTH, AND NINETEENTH FLOORS.

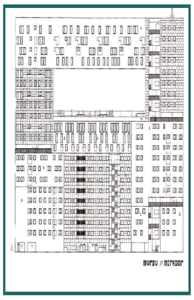
1 Plans and elevation from Privacy and Publicity by Aaron Betsky

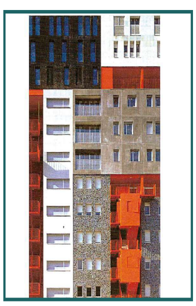






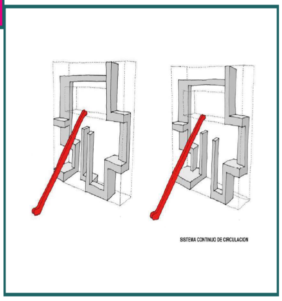






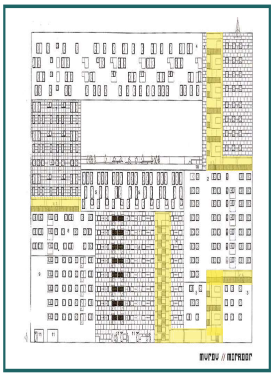
CIRCULATION

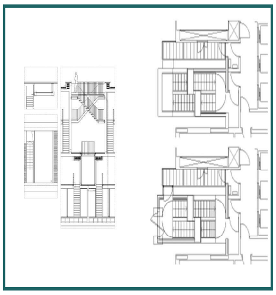
THE NINE BUILDING BLOCKS ARE CONNECTED BY A SYSTEM OF "VERTICAL STREETS" TO LINK THE NEIGHBORHOOD OF APARTMENTS TOGETHER.THE FIRE STAIRS WERE PULLED OUT OF THE INTERIOR OF THE TOWER MADE INTO OUTDOOR PLAZAS AND MEETING SPACES THAT ARTICULATED WITH THE BRIGHT ACCENT ORANGE COLOR.



THE CIRCULATION CORRIDORS WERE PAINTED A BRIGHT ORANGE WHICH CONTRASTED WITH THE GRAYSCALE OF THE MATERIAL USED TO CLAD THE REST OF THIS BUILDING.

THIS ORANGE RIBBON WRAPPED UP AND AROUND THE NINE BLOCKS TOFORM THEM INTO ONE UNIT ENDING FINALLY AT THE OPEN AIR COURTYARD ON THE 13TH FLOOR.

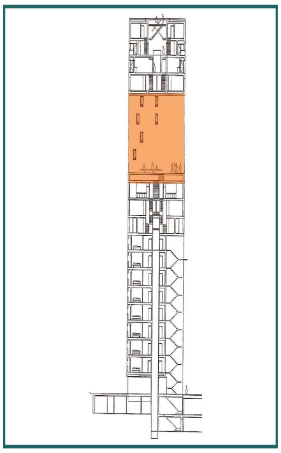


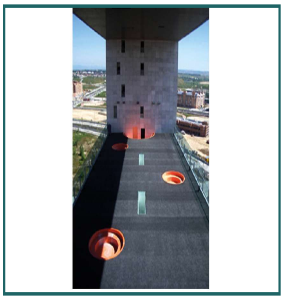


THE MIRADOR PLAZA

THIS SYSTEM OF EXTERNAL CIRCULATION ENDS AT THE 13TH STORY WITH A TALL OPEN AIR COURTYARD, THE MIRADOR, THAT PROVIDES VIEWS OF THE CITY OF MADRID AND ALSO OF THE SURROUNDING GUADARRAMA MOUNTAINS.

"THE LARGE LOOKOUT AT 40 METERS ABOUT THE GROUND PROVIDES OCCUPANTS AND NEIGHBORS WITH A COMMUNITY GARDEN AND A SPACE FROM WHERE THEY CAN CONTEMPLATE THE SKYLINE."
-MVRDV





STRUCTURE

THE STRUCTURE IS POURED CONCRETE WITH REINFORCEMENT OF REBAR. THE FLOOR PLATE HAS REBAR RUNNING IN BOTH DIRECTIONS IN ORDER TO KEEP THE FLOOR PLATES THIN AND THE SPACING OF THE COLUMNS ALSO HELPS TO KEEP THE FLOORS THINNER. THE COLUMNS WOULD HAVE A CONCRETE MESH WITH BENTREBAR ON BOTH THE TOP AND THE BOTTOM TO MAKE A PHYSICAL CONNECTION BETWEEN THE PIERS AND FLOOR WITH REBAR.

THIS SYSTEM IS CARRIED OUT UP UNTO THE 13TH FLOOR WHICH WAS THE SKY PLAZA. THE BUILDING IS STRUCTURALLY HONEST IN THE SENSE THAT THE WEIGHT IS CARRIED STRICTLY BY THE COLUMNS AND FLOOR SLABS. INFILL WAS THEN PLACED BETWEEN THE SLABS AND COLUMN TO MAKE THE WINDOW OPENINGS. THE CONCRETE PIERS ARE LEFT STRICTLY AS STRUCTURE IN THE MOVEMENT CORRIDORS REINFORCING THE IDEAS THAT EACH OF THE NINE BLOCKSARE SEPARATE UNITS AND SITTING ON THESE ORANGE CORRIDORS TO CONNECT THEM.

THE STEEL STRUCTURE SITS ON FOUR THICKER CONCRETE PIERS THAT ARE ONETHIRD THE WIDTH OF THE BUILDING.
THERE IS A MOMENT CONNECTION BETWEEN THE STEEL TRUSS AND THE CONCRETE PIERS.
TWO MAIN FOUR-STORY TRUSSES WITH CROSS-BRACING SUPPORT THE LATERAL LOAD OF THE CENTER SECTION WHILE STEEL BEAMS ARE PLACED ACROSS THE TRUSS BEAMS TO FORM THE FLOORS AT POINTS MARKED BY WELDED PLATES SHOWN STICKING OUT OF THE STRUCTURE IN THE PHOTO ON THE RIGHT.
THE SKELETAL STRUCTURE WAS ADDED AND THEN THE FINAL FOUR CONCRETE

THE STRUCTURAL SYSTEM IS WORTH NOTING ESPECIALLY BECAUSE OF THE CLADDING USED TO FINISH THE BUILDING AND THE CONCEPTUAL DRAWING.
THE EXTERIOR FINISH AND THE CONCEPTUAL DRAWING REINFORCE THAT THE FOUR STORIES ABOVE THE PLAZA ARE CANTILEVERING OFF OF THE WHITE CLADDED BLOCK WHEN REALLY THE CENTER SECTION IS A SKELETAL STEEL TRUSS THAT IS SUPPORTED ON ALL FOUR CORNERS. MVRDV DOES EVERYTHING TO TRY TO FORCE THE FORM OF THE BUILDING OVER THE ACTUAL STRUCTURAL CONSTRUCTION. THE DARK GREY STRIP NEXT TO THE ORANGE STAIR CORRIDOR IN THE PHOTO STARTS TO SHOW WHERE STRUCTURAL CONSTRUCTION OF THE BUILDING STARTS TO ENFORCE THAT THE PIECE IS NOT A CANTILEVER IN COMPARISON TO THE LIME GREEN BLOCK'S LACK OF CONNECTION TO THE STAIR IN THE CONCEPTUAL

THE 13TH FLOOR THROUGH THE 17TH FLOOR THE BUILDING SPLIT INTO THE TWO PIERS AND THE TWO PIERS ON EITHER SIDE TAKE THE LOAD FROM THE CENTRAL 18TH THROUGH 21ST FLOOR.
THE 20TH FLOOR WAS A PRIVATE ACCESS CORRIDOR TO THE ROOF FOR THOSE APARTMENTS ON THE TOP OF THE COURTYARD.

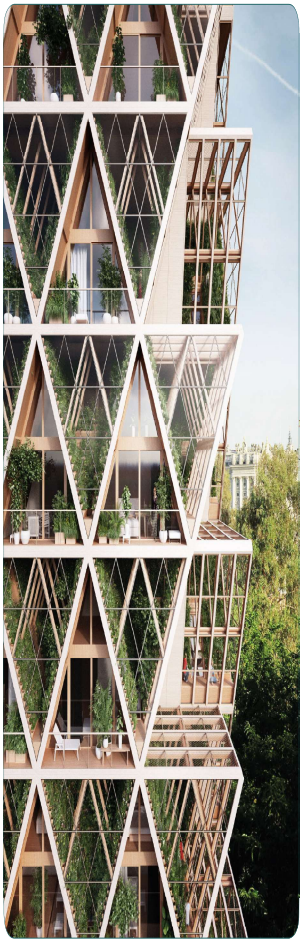
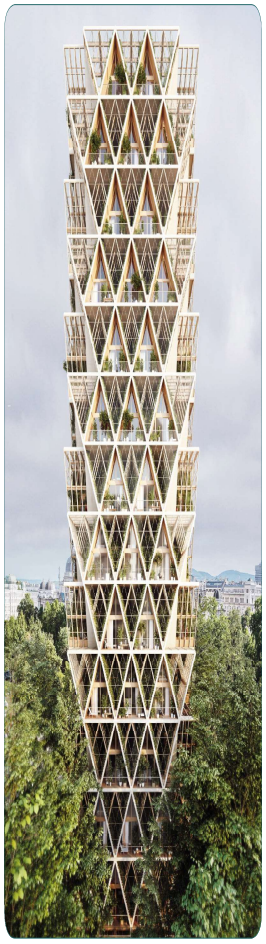
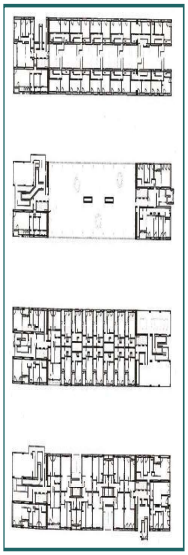
ELEMENTAL STUDY FOR REFERENCE





AR.CHRIS PRECHT AND HIS WIFE FEI PRECHT HAVE DESIGNED A VERTICAL FARMHOUSE THAT CONNECTS ARCHITECTURE AND AGRICULTURE IN ONE TOWER, BY ONLY USING MODULAR TRIANGULAR VOLUMES.



- A PROPOSAL CONSISTING OF COMMUNITY INTERACTIVE THEME
- A DESIGN THAT REDUCES THE GAP BETWEEN URBAN AND AGRICULTURAL SPACES
- A HOUSING THAT FOCUSES ON REDUCE-REUSE-RECYCLE
- GENERATING ITS OWN NEEDS TO MAXIMUM EXTENT
- BREAKING THE MONOTNY OF HOUSING WHILE PLAYING THROUGH PLAN OF BUILDING

- A PROPOSAL CONSISTING OF COMMUNITY INTERACTIVE THEME
- A DESIGN THAT REDUCES THE GAP BETWEEN URBAN AND AGRICULTURAL SPACES
- A HOUSING THAT FOCUSES ON REDUCE-REUSE-RECYCLE

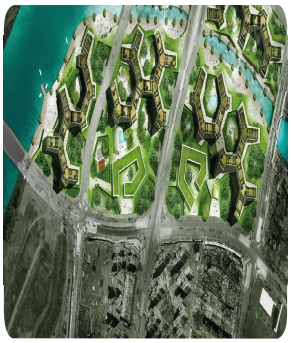
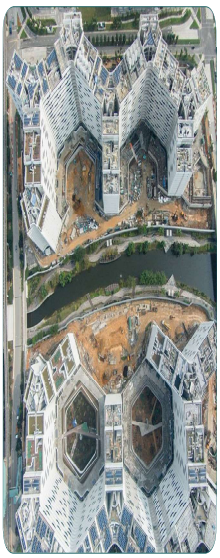
- BREAKING THE MONOTNY OF HOUSING WHILE PLAYING THROUGH PLAN OF BUILDING

Competition International Competition for Singapore Public Housing Award First Prize Project NamePunggol Waterway Terraces Architects group BasiaLocationPunggol Waterway, Singapore 822313 Area225000.0 sqm Project Year2015 Photographs Darren Soh. Courtesy of GroupBasia

CONCEPT

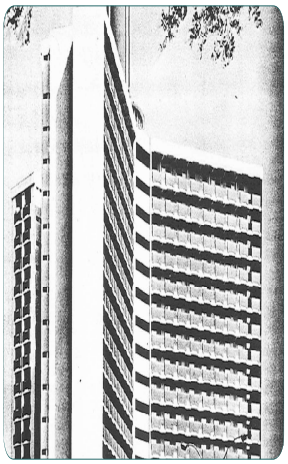
The Punggol Waterway Terraces, so named for the river on which they're set, will be a sustainable community that aims to echo the tropical exuberance of Singapore's first housing developments in the 1970's. Arranged around central courtyards, these high-rise apartments hope to create a sleek, graceful skyline that contrasts with the verdant greenery of their landscape.





COMPARATIVE ANALYSIS-SITE

S.NO.	PARTICULAR	CASE STUDY 1	CASE STUDY 2	LITERATURE STUDY



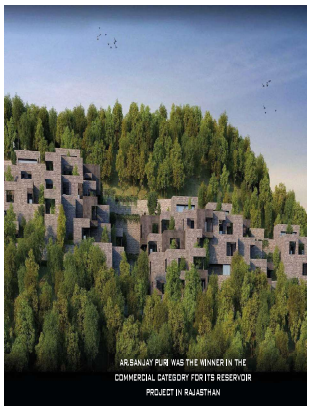
GROUPBASIA IS NEARING COMPLETION ON A FIRST-PRIZE WINNING PROPOSAL THAT IS MEANT TO REVIVE THE CONCEPT OF PUBLIC HOUSING IN SINGAPORE. THE PUNGGOL WATERWAY TERRACES, SO NAMED FOR THE RIVER ON WHICH THEY'RE SET, WILL BE A SUSTAINABLE COMMUNITY THAT AIMS TO ECHO THE UTOPIC EXUBERANCE OF SINGAPORE'S FIRST HOUSING DEVELOPMENTS IN THE 1970S. ARRANGED AROUND CENTRAL COURTYARDS, THESE HIGH-RISE APARTMENTS HOPE TO CREATE A SLEEK, GRACEFUL SKYLINE THAT CONTRASTS WITH THE VERDANT GREENERY OF THEIR LANDSCAPE.

THE MASTERPLAN FOR THE HOUSING DEVELOPMENT COVERS A SITE AREA OF ABOUT 70,000 SQUARE METERS, CREATING 1,876 RESIDENTIAL UNITS. LANDSCAPING PLAYS A LARGE PART IN THE DEVELOPMENT'S DESIGN; LARGE, HEXAGONAL VOIDS WITHIN THE STRUCTURE PROVIDES GARDEN SPACE THAT CAN BE SEEN AND SHARED BY THE BUILDING'S COMMUNITY. THE TERRACING OF THE BUILDINGS THEMSELVES IS MEANT TO RESEMBLE THE MOUNTAINSIDE RICE FIELDS THAT ARE SO COMMON ACROSS ASIA. THIS DESIGN CHOICE ALSO ALLOWS FOR EVEN MORE GARDEN SPACE ON THE BUILDINGS' ROOFTOPS.

THE HOUSING UNITS OF PUNGGOL WATERWAY TERRACES ARE MODULAR, ALLOWING FOR RESIDENCES TO CHANGE ALONGSIDE THE NEEDS OF THE FAMILY LIVING IN THEM. THE BUILDINGS' THIN PLANS ALLOW FOR GENEROUS VIEWS OF THE SURROUNDING GARDENS OR WATERWAY FROM EACH OF THE APARTMENTS. AT THE SAME TIME, THE BUILDING'S SHAPE AND ORIENTATION PREVENTS UNWANTED SOLAR GAIN FROM THE UNITS' WINDOWS, AND MAXIMIZES NATURAL VENTILATION.

Punggol Waterway Terraces is currently under construction. GroupBasia won the competition through a competition in 2013.

FUTURE TOWERS MVRDV IN PUNE



AR.SANJAY PURI WAS THE WINNER IN THE COMMERCIAL CATEGORY FOR ITS RESERVOIR PROJECT IN RAJASTHAN

OASIS

Urban Oasis

MY THESIS TOPIC IS URBAN OASIS. I CHOSE THIS TOPIC AS I WAS LOOKING TO WORK ON A PRACTICAL PROBLEM THAT NEEDS TO BE HANDLED ,AS URBANIZATION INCREASING AT RAPID RATE AND AGRICULTURAL SECTOR DEPRIVING, SO I DECIDED WHAT IF BOTH SECTOR ARE GROUPED TOGETHER IN A SINGLE PROJECT. AN “URBAN OASIS” DEPICTING URBAN HOUSING AS DESERT AND AGRICULTURAL PRACTICE AS A OASIS IN DESERT.
